

ESSENTIALS FOR PMO MANAGERS™

What Differentiates
Essentials for PMO Managers
from other PMO learning options?

Other learning options

The Essentials for PMO Managers qualification is aimed at those working within a PMO and looking to develop their own knowledge, capability and competency. There are other courses available for senior PMO professionals today, such as P3O® Practitioner which focuses on developing organisational capability. P3O® is a theory-based qualification and concentrates on the methodology for designing, creating and transforming PMOs.

There are other lesser-known courses in the market – predominately aimed at experienced PMO managers - but none of these options explain to learners, as Essentials for PMO Manager does, the responsibilities which are part of this role and the knowledge, skills and behaviours which are needed to be successful.

ESSENTIALS FOR PMO MANAGERS™

How is Essentials for PMO Managers different?

- The course is designed to develop individuals, rather than the PMO.
- It is an entry level course, not for the profession, but for the PMO Manager role. A practical course which explains the key activities and the core competences required to perform in this role.
- As this course is for aspiring PMO Managers or those new to the role it provides an outline of the learning journey needed to become fully competent.
- It is not method or framework specific. The syllabus has been created based on real world challenges that PMOs and their managers face.

Whether you work for an organisation wanting to ensure your PMO Managers have the capability to manage this office, or are an individual looking to advance your career, this course offers a comprehensive blueprint for best practice in this role.
