

Effective Benefits Management comprises activities from project inception through to post project closeout. There are actions to be undertaken by senior management, the project sponsor, project manager, the project team and the PMO. The course provides an overview of the full Benefits Management lifecycle and explores challenges, tactics and strategies.

Why should you take the course?

- 01 Learn about the key stages of the Benefits Management Lifecycle and how it aligns to the Project and Programme Lifecycle
- 02 Explore the role of the PMO in implementing and supporting Benefits Management
- 03 Understand the key tools, techniques and deliverables within each stage of the Benefits Management Lifecycle
- 04 Explore the challenges of implementing and supporting Benefits Management in an organisation

Duration: 2 days
Prices via the Website
Virtual Classroom or In-house

Clear and made it easy to understand with live examples which help contextualise the points made.

Who is it for?

- 01 Is your organisation looking to implement Benefits Management?
- 02 Are you working in a PMO that supports a Benefits Management Lifecycle?
