

Setting Up a PMO

In any organisation, there comes a time where the time, effort and money spent on projects needs better coordination, control and visibility. Often the people asked to implement PMO techniques have little experience of project management themselves and industry 'best practice' seems too big a leap. This course is designed to take you back to basics, and provide practical guidance to develop a roadmap for your organisation to create a Project Management Office that supports, rather than stifles, project delivery.

Why should you take the course?

- 01 Understand the role of a Project Management Office and why they get set up
- 02 Understand the components of governance and how it impacts PMO set up
- 03 Receive tools, techniques and templates to establish a consistent and robust Project Delivery Framework
- 04 Explore the Project Management Office Implementation Roadmap - the real-life practical steps to take!

Duration: 2 days
Prices via the website
Virtual Classroom or In-House

I will come away from the course with lots of practical implementable "stuff" – it's been excellent.

This hands-on course provides a host of tools, techniques and templates

Who is it for?

- 01 Have you been asked to set up a Project Management Office and don't know where to start?
- 02 Is your organisation looking to formalise project management?
